1 of 1 review helpful I wrote this book for trail riders in Montana By Carellen Smith The inspiration for this book was ten years horse packing in Montana I used to go to the USFS stations and ask about trails and trailheads to find out if I could get in and out with a 6 horse trailer whether there was water hitch rails a camp spot grass for stock etc I often rode young green horses or mules and needed to know the Climb into the saddle and join a rich Montana tradition of horses riders and packers Richer though than this heritage is the land from which it springs From the back of a horse you can glimpse country in Glacier National Park in major national forest lands and in wilderness areas of western Montana few people ever see Ride along the Rocky Mountain Front where the prairie meets rocky escarpments and explore other great Montana mountain ranges Swans Bit From the Author After moving to Montana in 1986 and trying to find out what trailheads and trail conditions were around the Flathead Valley and in the Bob Marshall Wilderness nbsp I went to every Forest Service station I could and asked for information nbsp
